

# Aiken Viewer

## Zero Footprint Viewer

- Modern, intelligent diagnostic flow for efficiency
- No installation required, access from anywhere

## Advanced 3D Capabilities

- 3D MPR with Continuous MIP for precise imaging
- 3D VR Client & 3D Aiken Viewer for in-depth visualization

## Precision Measurement & Analysis

- Freehand ROI, Cobb's Angle for detailed assessment
- Worklist Integration
- Cine & Hanging Protocols
- Auto Spine Labeling for structured reporting
- Smart Pointer & Hanging Protocol for optimal workflow

## Mobile & Web Viewing

- Full-fledged multi-platform viewer with browser support
- Aikenist Web Viewer for seamless access
- Mobile Viewer with Reporting

## Study Comparison

- Previous Study Tracking & Scan Comparison
- Reporting integrated with viewing for seamless workflow
- AI tools integration
- Multiple Modality – Supports the Endoscopy, Ultrasound, CT, MR, XRAY

## Optimized radiology workflow.

- PET-CT Fusion for enhanced visualization
- Keyboard & mostly Customization

## Collaboration & Enhanced Visualization

- Annotation, Sync, Video Playback for better case discussion
- Multi-window support (2+1 View) for parallel analysis
- Key Image Selection & Print/Copy to Report

## Segmentation Support

- Automatic detection and outlining of key anatomical structures and abnormalities.
- Works across CT, MRI, and X-ray scans for comprehensive analysis.
- Side-by-side segmentation comparison across timepoints or modalities.
