

# Calcium Scoring

AI-Powered Calcium Scoring Tool

Certificates

# Calcium Scoring

## Purpose

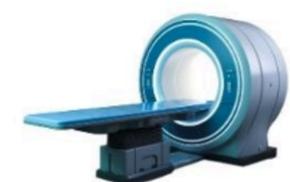

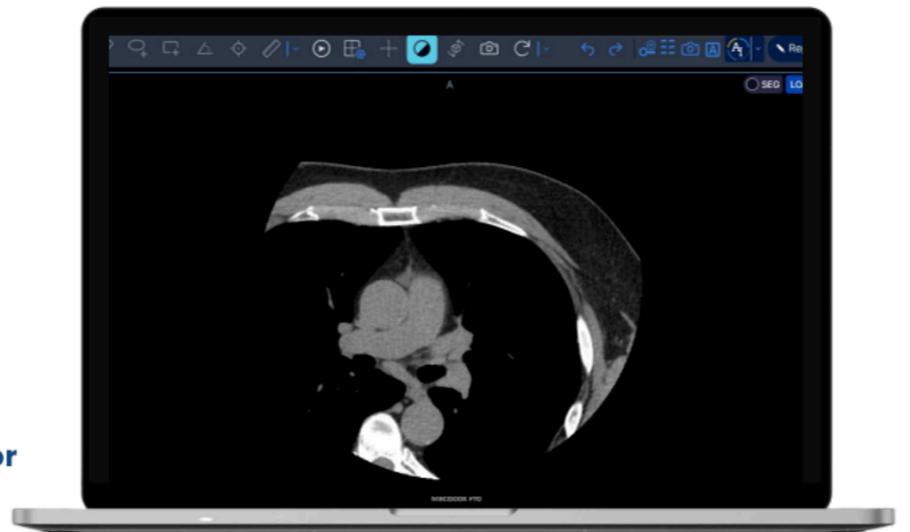

Assesses coronary artery calcification using non-contrast cardiac CT scans.

## Risk Assessment

- Highlights risk categories.
- Compares results with age- and gender-matched populations.
- Recommends CT Angio in cases of high calcium scores for plaque assessment.

## Outcome

- Works well even in challenging cases like high heart rates or arrhythmias.
- Enables faster and more informed cardiac care decisions.
- Manual Correction Option, allowing users to fine-tune or override automated results for greater accuracy.

Modality Console

Aiken Pusher

QuickDiag Workstation

AI automatically performs Agatston and volume scoring.
